# Mosquito Control

The next scheduled spraying dates are Thursday, May 24th and June 28th

Take a personal stake in the process! Help prevent the breeding of mosquitoes by ensuring that the areas on your property

have no standing water. Check your buckets, flower pots, trash containers, or other likely collection areas and dump them out on a regular basis. When going outside, especially from dusk to dawn, wear clothes that cover as much of your skin as possible and use insect repellent. **Remember the 3 D's:**

**Dress** in long sleeves and pants when you're outside or working in your yard. For extra protection, you may want to spray thin clothing with repellent.

**DEET** is the ingredient to look for in your insect repellent. Follow labeled instructions.

**Drain** standing water where you find it. Look for flowerpots, clogged rain gutters, etc. and anywhere mosquitoes could breed. For more information, visit the Town's website: [www.townofpantego.com](http://www.townofpantego.com). Thank you for your cooperation.

**Mosquito dunks (one package per resident) are available at Town Hall to treat standing/stagnant water that cannot be emptied (i.e. ponds, fountains, etc.)**

Changes are coming to the recycling collection process.

The Town Council has approved a new trash and recycling contract with Republic Waste Services that includes 65-gallon recycling carts that will replace the current 18-gallon recycling bins. The carts will be distributed in late June and Republic will be

providing more information on when and how this will occur closer to that time.
