

**The Sonoma County Water Agency
2006 Stream Maintenance Program
Providing Flood Protection For Our Community**

This summer, the Sonoma County Water Agency targeted 36 streams within Sonoma County to perform flood protection maintenance. Now that summer is over, the Agency is continuing to complete work on as many streams as possible before weather conditions prohibit outdoor work. Below is an updated list of streams the Sonoma County Water Agency has completed work on and will be continuing maintenance on this fall.

The goal of the maintenance work is to form and promote the development of shaded riparian canopies with alders and other trees that grow tall and stretch their branches over the creek, cooling the water and shading out bushes, brush and less desirable species of trees that reduce the water-carrying capacity of the creek.

Petaluma

<u>Stream Name</u>	<u>General Location Description</u>	<u>Status</u>
<u>Adobe</u>	<u>Upstream of Maria Dr.</u>	<u>SSRCD removed Willows and Cattails</u>
<u>Capri</u>	<u>Ely Rd. to McDowell Blvd.</u>	<u>Scheduled for the week of 11/6</u>
