RE: West Slope Stormwater Resource Plan

El Dorado County Water Agency, in collaboration with El Dorado County and the City of Placerville, is developing a stormwater resource plan (SWRP) for the West Slope of El Dorado County. The SWRP is a watershed-based comprehensive strategic document that summarizes a renewed approach to watershed resource planning and stormwater runoff management in the County. The plan will also incorporate prioritized actions, affordability considerations, and nexus to other related resource planning and implementation efforts to support efficient and responsible implementation. This document is being prepared in accordance with the State Water Resources Control Board's Stormwater Resource Plan Guidelines in order to comply with Water Code sections 10560 et seq. (as amended by Senate Bill 985, Stats. 2014, ch. 555, § 5).

Attached to this email, for your review, is the Draft SWRP. The Plan will be available for public comment from January 26, 2018 to February 26, 2018. Please let me know if you have any comments or questions regarding the plan.

Sincerely,

Kenneth V. Payne, P.E.
General Manager
