

Section D. MATERIALS WASTE MANAGEMENT COMPANY:

The waste removal and recycle will be exclusively contracted with the City of Placerville approved waste management company El Dorado Disposal Service who can legally collect and haul mixed construction and demolition debris for recycling. El Dorado Disposal Services can create a Debris Recycling Report for your record and copy to the Development Services Department, Building Division.

Name of Certified Waste Management Company: El Dorado Disposal Services

Location of Certified C&D Sorting Facilities: 4100 Throwita Way, Placerville

CWMC contact person: _____ Date of contract: _____

Note: At the time of final inspection use the City of Placerville **ACTUAL MATERIAL DISPOSAL / DIVERSION WORKSHEET** to list total quantities of the construction waste co-mingled or provide documentation from the Waste Management Company showing 65% recycled waste that includes:

- 1 Submittal of a completed Waste Reduction and Recycling report from El Dorado Disposal Services.
- 2 Receipts from the El Dorado Disposal Services which collected or received the materials showing the actual weight, weight slips/count of materials salvaged, or volume of the materials (recyclables and solid waste).
- 3 Any additional documentation to support a good faith effort to comply.

To the best of my knowledge, the tonnage and diversion percentage estimates reported on the **ANTICIPATED MATERIAL DISPOSAL / DIVERSION WORKSHEET** at the time of permit application are my best estimate of disposition of construction and demolition materials generated at this project site. Verifiable documents will be provided to demonstrate compliance with 50% Waste Reduction and Recycling from the waste manage company, self-haul or El Dorado Disposal Services report.

I will reduce and/or recycle a minimum fifty percent of the debris generated by my project.

I will clearly designate what is recyclable and remain on the jobsite for re-use and check all recycling waste for contamination of hazardous materials.

I will keep a record of all reduction, re-use and or disposal activities while the project is being performed and will **attach** the El Dorado Disposal Services receipts and/or weight tags to the Debris Recycling Report.

I will file the Debris Recycling Report within 60 days after the final inspection approval.

I certify I have read and state under penalty of perjury, I will take responsibility for this project's compliance with CALGreen regulations section 4.408.2 (residential) or 5.408.1.2 (non-residential) utilizing El Dorado Disposal Services as a certified C&D waste management company.
