

"Placerville, a Unique Historical Past Forging into a Golden Future"

City Manager's Report
April 26, 2016 City Council Meeting
Prepared By: M. Cleve Morris
Item#: 12.2

Subject: Review and Approve New Trash/Recycling Containers for Main Street.

Discussion: Last year, the City began the process of improving Main Street. Those improvements were started as a result of the Main Street Streetscape Design Plan which was adopted in 2006. The plan identifies improvements to Historic Downtown Placerville. These improvements include site furniture and other items. This report states:

"... as other streetscape elements have been selected with a strong eye toward using Victorian ornament as the unifying thread for the various periods of architecture represented along Main Street, the trash containers have become increasingly out of character. This is particularly apparent when a trash container is placed next to one of the new street lights. To correct this situation, as the trash containers reach the end of their life cycle or as opportunities present themselves to relocate the existing containers to more appropriate locations (e.g., the city's parks), the trash containers should be replaced with ones that create a seamless visual unity with the street lights and benches."

One of the items identified in the report is to replace the existing trash containers with ones that represent the "Victorian ornament". As part of the Main Street process last year, we did a survey to ask what style of furniture should be considered. Part of that survey showed options for trash receptacles. Attached is the survey page showing the options presented to the Public and as you can see the preferred receptacle as voted by the public. These were not included with the bid. Staff has been doing additional research, and has identified funding to replace the existing containers. The second attachment shows an additional receptacle that Staff is recommending for consideration. The advantage to this receptacle is that the top will not be removed. These containers have doors on the side that open up to allow for emptying the containers. The constant removal of the tops is partially the cause of these breaking. It is our hope that by eliminating this requirement to move the top on a daily basis, we can keep the lids from breaking.

As you can see, the new containers will be for both trash and recycling. We have shown these containers to El Dorado Disposal and they are in agreement that this will best meet their needs. By adding recycling, this basically doubles the disposal capacity on Main Street. It is our hope that by doing this we may be able to eliminate some of the current receptacles to keep the sidewalks more open.

At this time we have secured the following funding:

State Recycling Grants:	\$15,000
County Recycling Grant (also from the State):	\$7,500
El Dorado Disposal:	TBD (Based on need)

El Dorado Disposal has agreed to assist us in order to complete the project. It is estimated that the total cost of the project is approximately \$52,000. Attached are three quotes for the containers we have obtained. As you can see, they are very similar except one does not include tax. If you add tax to this one, they are all approximately \$51,000 - \$54,000.

Staff is seeking approval of the proposed container, or if there is a process that Council would like us to follow to select these, give us that direction. Our goal was to have these installed prior to the Gold Panning Championships, however with the 4 – 6 week lead time, we may not make it, depending on when we can get them ordered.

Options:

1. Approve selected Trash Receptacle as recommended by Staff.
2. Approve the style selected by the survey.
3. Direct Staff to proceed with a different process to select the containers.
4. Do not make the purchase at this time.

Cost: Based on the selection of the final containers, Staff will bring back a recommendation for the final purchase.

Budget Impact: None. All funding will be provided through grants and donations.

Recommendation: Review and Approve New Trash/Recycling Containers for Main Street.

M. Cleve Morris, City Manager

Attachments:

1. *Proposed Containers*
2. *Survey Recommended Containers*
3. *Quotes for Proposed Containers*

Proposed:

6. Which style of trash/recycling receptacles do you prefer? K, L1 or L2? (Don't consider color in answering this question).

- ☐ K - Dual can Victor Stanley Model DYN-242 **PREFERRED** ☐ L2 - Single can Victor Stanley Model RSDC-36
- ☐ L1 - Single can with logo ☐ Neither - I would prefer that the project not include additional trash receptacles.

Additional information. In order to be fully considered, please be brief, and specific.
