ADDENDUM #3

DATE: 01/29/2016

PROJECT: BLAIRS LANE BRIDGE REPLACEMENT PROJECT

CONTRACT No: 40604

BID DATE, TIME: 02/11/2016, 2:00PM

NOTICE TO ALL CONTRACTORS SUBMITTING BIDS AND ALL PLANHOLDERS:

You are hereby notified of the following changes, clarifications, or modifications to the contract documents. This addendum shall supersede the original contract documents and subsequent addenda. Wherein this addendum contradicts the original contract documents and previous addenda, this addendum shall take precedence. All other conditions shall remain unchanged. The change(s) specified below shall become a legal part of the original contract documents. The Bidder shall acknowledge receipt of the addendum by signing the attached acknowledgement sheet and on noting on sheet P-13 of the Proposal.

CHANGES AND/OR CLARIFICATIONS TO THE NOTICE TO BIDDERS:

1. Bid opening revised to Thursday, February 11, 2016; 2:00 p.m.

CHANGES AND/OR CLARIFICATIONS TO THE SPECIFICATIONS:

*Replacement pages are attached for all Specification changes.

- 2. On page SP-21, in Section 2-1.33D(2)(b): all documents will be due at the time of bid opening except the Exhibit –12-B Bidder's List of Subcontractors Part II, List of Subcontractors with public works contractor registration number, DBE Commitment, DBE confirmation and DBE good faith which are due on the 4th business day after bid opening at 2:00 pm for the 1st, 2nd and 3rd low bidder.
- 3. On page TSP-36, in Section 19-1.03A: replace with the following:

Add to section 19-1.03A:

Rock is expected during excavation for structure footing. Refer to the Information Handout for additional geotechnical information, including but not limited to, the Foundation Report and the Preliminary Site Investigation. For geotechnical information regarding sewer line and manhole excavations see sections 78-1.03 and 78-2.03. No additional compensation will be allowed therefor.

4. Beginning on page TSP-51, in Section 78-1.03, in the "Excavation" paragraph: add the following paragraph at the end of this section on page TSP-52:

Moderately weathered to intensely weathered rock should be expected while excavating the main sewer line and manholes. During preliminary investigations the material was able to be augered through with a hollow stem auger equipped with tungsten carbide drilling teeth. Contractor shall plan to excavate with a 100,000-lb or greater excavator with rock bucket and rock teeth. There may be areas where a small hydraulic ram with pointed breaker bar may be required, bid accordingly. Refer to the Information Handout for additional geotechnical information, including but not limited to, the Foundation Report and the Preliminary Site Investigation. No additional compensation will be allowed therefor.

5. On page TSP-54, in Section 78-2.03, in the "Excavation" paragraph: Add the following paragraph

CITY OF PLACERVILLE, CALIFORNIA DEVELOPMENT SERVICES DEPARTMENT ENGINEERING DIVISION

after the 1st paragraph:

Moderately weathered to intensely weathered rock should be expected while excavating the main sewer line and manholes. During preliminary investigations the material was able to be augered through with a hollow stem auger equipped with tungsten carbide drilling teeth. Contractor shall plan to excavate with a 100,000-lb or greater excavator with rock bucket and rock teeth. 19 EARTHWORK

Add to section 19-1.01A:

- 8. Excavating Type DC and Type DC metal materials
- 9. Trench plugs
- 10. Overexcavation (retaining wall)

Reset flagpole within the Caltrans parcel once earthwork in that area is complete.

City provided California registered environmental professional must be on site before the start any earth moving activities at the bridge or north of the bridge.

Add to section 19-1.03A:

Rock is expected during excavation for structure footing. Refer to the Information Handout for additional geotechnical information, including but not limited to, the Foundation Report and the Preliminary Site Investigation. For geotechnical information regarding sewer line and manhole excavations see sections 78-1.03 and 78-2.03. No additional compensation will be allowed therefor.

Comply with section 19-3.02F for trench plug material.

Contaminated soil and groundwater may be encountered in any excavations. Comply with sections 7-1.02, 14-11.06, 14-11.08 and 78-2.

Double handling of earthwork materials may be required.

Add section 19-1.03F Excavation Near PG&E Transmission Tower:

You should be aware of the potential issues and limitations with the PG&E transmission tower foundation, see the PG&E Utility Pole Stability Analysis Memorandum in the *Information Handout*. You must independently verify the stability of the PG&E transmission tower pole and its foundation and provide shoring if required.

Effort should be made to avoid unnecessary excavations performed around the foundation.

Before excavating in the area of the transmission tower submit an excavation plan to the Engineer for review.

Excavation near the PG&E transmission tower requires pre-construction and post-construction surveys of the tower to ensure activities do not result in any appreciable deflections of the foundation and structure. Monitor the foundation movement daily until excavation has been backfilled. Provide the Engineer with a copy of all documents.

The excavated area must be backfilled with material compacted to 95% relative compaction in the area of the tower.

Add to section 19-1.04:

The Department pays you for transmission tower surveys based on the bid item lump sum price divided by the number of contract working days. A total 100% will be paid upon completion of all ground disturbing activities near the transmission tower.

Payment for reset flag pole is included in the payment for roadway excavation.

Excavation for Type DC metal material and Type DC material is paid for as the type of excavation involved.

Double handling of earthwork materials is included in the payment for the types of excavation involved.

overdepth excavation beneath structures, and overdepth excavation in such locations shall be rectified by backfilling with sand, graded gravel, or concrete as directed by the City.

Moderately weathered to intensely weathered rock should be expected while excavating the main sewer line and manholes. During preliminary investigations the material was able to be augered through with a hollow stem auger equipped with tungsten carbide drilling teeth. Contractor shall plan to excavate with a 100,000-lb or greater excavator with rock bucket and rock teeth. There may be areas where a small hydraulic ram with pointed breaker bar may be required, bid accordingly. Refer to the Information Handout for additional geotechnical information, including but not limited to, the Foundation Report and the Preliminary Site Investigation. No additional compensation will be allowed therefor.

<u>Bracing</u> - The Contractor's design and installation of bracing and sheeting shall take the necessary precautions to be consistent with the rules, orders, and regulations of the State of California Construction Safety Orders.

Excavations shall be so braced, sheeted, and supported that they will be safe, such that the walls of the excavation will not slide or settle and all existing improvements of any kind, either on public or private property, will be fully protected from damage.

The sheeting, shoring, and bracing shall be arranged so as not to place any stress on portions of the completed work.

The Contractor shall carefully remove sheeting, shoring, bracing, and timbering to prevent the caving or collapse of the excavation faces being supported.

<u>Dewatering</u> - The Contractor shall provide and maintain means and devices to continuously remove and dispose of all water entering the excavation during construction of the structure and during backfill operations.

Water shall be disposed of in accordance with Section 14-11.06 so as to prevent damage to adjacent property and pipe trenches.

The Contractor shall not allow water to rise in the excavation until backfilling around and above the structure is completed.

<u>Backfill</u> - After structures and foundations are in place, backfill shall be placed to the original groundline or to the limits designated on the plans.

No material shall be deposited against cast in place concrete structures until the concrete has reached a compressive strength of at least 2,500 pounds per square inch.

Backfill material shall be placed in horizontal layers not exceeding 8 inches in depth.

Compaction - Compaction requirements shall be as follows:

- A. Backfill within 5 feet of structure: 95% relative compaction.
- B. Structural Backfill beyond 5 feet of structure: 90 % relative compaction.
- C. Gravel Base: 95% relative compaction.

Each layer of backfill material shall be moistened and thoroughly tamped, rolled, or otherwise compacted to the specified relative density.

Compaction equipment shall be carefully operated near structures to prevent their displacement or damage. Structural fill is to be placed and compacted in uniform layers around all sides of the structure.

<u>Excess Excavated Material</u> - The Contractor shall make the necessary arrangements for, and shall remove and dispose of all excess excavated material.

All surplus material shall become the property of and be disposed of offsite by the Contractor.

No excavated material shall be deposited on private property unless written permission from the owner thereof is secured by the Contractor. Before the City will accept the work as being completed, the Contractor shall file a written release signed by all property owners with whom he has entered into agreements for disposal of excess excavated material absolving the City from any liability connected therewith.

Disposal of excess excavated material shall comply with sections 14-11.06 and 14-11.08.

Restoration of Damaged Surfaces and Property - If any existing improvements, facilities, or vegetation not designated to be removed have been damaged, removed, or disturbed by the Contractor, for whatever reason, such improvements, facilities and vegetation shall be replaced or repaired at the expense of the Contractor.

<u>Final Clean-up</u> - After backfill has been completed, the right-of-way shall be dressed smooth and left in a neat and presentable condition to the satisfaction of the City.

78-1.04 MEASUREMENT AND PAYMENT

No direct measurement or payment will be made for the work to be done or the materials and equipment to be furnished under this section.

78-2 TRENCH EXCAVATION, BACKFILL AND COMPACTION

78-2.01 GENERAL

This section governs the work for trench excavation, backfill and compaction for underground pipeline work

Submittals - Upon request, the following items shall be submitted and approved by the City.

- A. Test results showing gradation, durability and sand equivalent of pipe zone material.
- B. Permit and notification form for excavations 5 feet or more in depth as required by Cal-OSHA, including any trench excavation or shoring plans.

Testing - Testing frequency and location shall be approved by the City.

78-2.02 MATERIALS

Trench Excavation ---- Excavation is unclassified, except as noted. The Contractor shall complete all excavations regardless of the type of materials encountered. The Contractor shall make his own estimate of the kind and extent of the various materials which will be encountered in the excavation.

Attention is directed to sections14-11.06 and 14-11.08 regarding type DC, DC metals and GC materials.

Pipe Zone ---- Material for the pipe zone shall conform to one of the following:

- A. Sand/Decomposed Granite ---- Sand shall be free from organic matter, clay, debris, or any other material that, in the opinion of the Engineer, is objectionable or deleterious. Sand shall not have more than 13 percent passing a 200-mesh screen. Minor amounts of gravel up to 1 /2 inch in size will be permitted. The sand equivalent shall not be less than 30 and a durability index of not less than 35.
- B. Aggregate Base ---- Base shall be 3/4 inch and minus or ½ inch and minus. The aggregate size gradation shall comply with Caltrans Specifications for Class 2 road base. The sand equivalent shall be 30 minimum. The durability index shall be 35 minimum.
- C. Plug and Drain Material ---- When a plug and drain system has been approved by EID and the County DOT, pipe zone material shall be Caltrans Standard permeable material designed for the specific condition.

Backfill - Material for backfill from 12 inches above the top of the pipe to subgrade, shall be free from organic matter, debris, and rocks larger than 6 inches in diameter or length. The District shall be the sole judge of conformance of backfill material to this specification.

Backfill material shall generally conform to the following gradation:

Sieve Size	Percent Passing
6"	100
3"	50
#4	35-100
#30	20-100

78-2.03 CONSTRUCTION

<u>Excavation</u> - Excavation for pipelines, fittings, and appurtenances shall be open trench to the depth and in the direction necessary for the proper installation of the same as shown on the contract drawings or as otherwise approved by the Engineer. Excavation shall only proceed when the necessary materials have been delivered to the site.

Moderately weathered to intensely weathered rock should be expected while excavating the main sewer line and manholes. During preliminary investigations the material was able to be augered through with a hollow stem auger equipped with tungsten carbide drilling teeth. Contractor shall plan to excavate with a 100,000-lb or greater excavator with rock bucket and rock teeth. There may be areas where a small hydraulic ram with pointed breaker bar may be required, bid accordingly. Refer to the Information Handout for additional geotechnical information, including but not limited to, the Foundation Report and the Preliminary Site Investigation. No additional compensation will be allowed therefor.

The Contractor shall bear all costs of disposing of roots and all other waste materials from the excavation. Material shall be disposed of in such a manner as to meet all requirements of the state, county, and local regulations regarding health, safety, and public welfare. Non-flammable material and flammable material, when burning is not permitted, shall be disposed of off the construction site in an approved location at the Contractor's expense.

The Contractor shall remove obstructions within the trench area or adjacent thereto, such as abandoned concrete structures, logs, and debris of all types, without additional compensation. The Engineer may, if requested, make changes in the trench alignment to avoid major obstructions, if such alignment can be made without adversely affecting the intended function of the facility.

A. <u>Existing Pavement Removal</u> - Pavement to be removed shall be removed and replaced in the manner prescribed by the Agency issuing the encroachment permit.

Existing pavement, curbs, gutters, sidewalks and driveways to be removed in connection with construction shall be neatly saw cut prior to removal. Saw cuts shall have a minimum depth of one inch in concrete sidewalk.

Concrete sidewalks or driveways shall be removed so that a minimum 30-inch square is replaced. If the saw cut in a sidewalk or driveway would fall within 30 inches of a construction joint, expansion joint, or edge, the concrete shall be removed and replaced to the joint or edge. If the saw cut would fall within 12 inches of a score mark, the concrete shall be removed and replaced to the score mark. Concrete shall be removed by jackhammer.

- B. <u>Grading and Stockpiling</u> The Contractor shall control grading in a manner to prevent water running into excavations. Obstructions of surface drainage shall be avoided and means shall be provided whereby storm and wastewater can be uninterrupted in existing gutters, other surface drains or temporary drains. Material for backfill or for protection of excavation in public roads from surface drainage shall be neatly placed and kept shaped so as to cause the least possible interference with public travel. Free access must be provided to all fire hydrants, water valves, meters and private drives.
- C. <u>Line and Grade</u> The Contractor shall excavate the trench to the lines and grades shown on the plans. Any deviations shall first be approved by the Engineer.

The trench shall be excavated to a minimum depth of 6 inches below the bottom of the pipe. The sides of the trench shall be excavated and maintained as nearly vertical as is practical.

D. <u>Trench Support</u> - The trench shall be adequately supported and the safety of workers provided for as required by the standard of the appropriate regulatory agency.

All shoring for open excavations shall conform to the State of California, Department of Industrial Relations, Division of Industrial Safety "Construction Safety Orders."

The Contractor shall be responsible for adequately shored and braced excavations so that the earth will not slide, move or settle, and so that all existing improvements of any kind will be fully protected from damage.

No shoring once installed, shall be removed until the trench has been approved for backfill operations. Removal of shoring shall only be accomplished during backfill operations and in such a manner as to prevent any movement of the ground or damage to the pipe or other structures.

The Contractor shall obtain all permits for any excavations over five feet in depth into which a person is required to descend or any excavation less than five feet in depth in soils where hazardous ground movement may be expected and into which a person is required to descend.

Excavated material shall not be placed closer than two feet from the top edge of the trench. Heavy equipment should not be used or placed near the sides of the trench unless the trench is adequately braced.

E. <u>Use of Explosives</u> – Use of explosives will not be permitted.

SCOPE OF WORK

Includes the installation testing, service and maintenance, of the following systems which utilize the transmission and/or transference of voice, sound, vision and digital for commercial, education, security and entertainment purposes for the following TV monitoring and surveillance, background-foreground music, intercom and telephone interconnect, inventory control systems, microwave transmission, multi-media, multiplex, nurse call system, radio page, school intercom and sound, burglar alarms, and low voltage master clock systems.

A. SOUND AND VOICE TRANSMISSION/TRANSFERENCE SYSTEMS

Background foreground music Intercom and telephone interconnect systems, Telephone systems, Nurse call systems, Radio page systems, School intercom and sound systems, Burglar alarm systems, Low voltage master clock systems, Multi-media/multiplex systems, Sound and musical entertainment systems, RF systems, Antennas and Wave Guide.

B. FIRE ALARM SYSTEMS Installation, wire pulling and testing

- C. TELEVISION AND VIDEO SYSTEMS Television monitoring and surveillance systems, Video security systems, Video entertainment systems, Video educational systems, Microwave transmission systems, CATV and CCTV
- D. SECURITY SYSTEMS Perimeter security systems
 Vibration sensor systems Card access systems Access
 control systems Sonar/infrared monitoring equipment

E. COMMUNICATIONS SYSTEMS THAT TRANSMIT OR RECEIVE INFORMATION AND/OR CONTROL SYSTEMS THAT ARE INTRINSIC THE ABOVE LISTED SYSTEMS SCADA (Supervisory Control and Data Acquisition) PCM (Pulse Code Modulation) Inventory Control Systems Digital Data Systems Broadband and Baseband and Carriers Point of Sale Data Communication VSAT Data Systems Systems Systems RF and Remote Control Systems Fiber Optic Data Systems WORK EXCLUDED Raceway systems are not covered (excluding Ladder-Rack for the purpose of the above listed systems). Chases and/or nipples (not to exceed 10 feet) may be installed on open wiring systems. Energy management systems. SCADA (Supervisory Control and Data Acquisition) when not intrinsic to the above listed systems (in the scope). Fire alarm systems when installed in raceways (including wire and cable pulling) shall be performed at the electrician wage rate, when either of the following two (2) conditions apply:

- 1. The project involves new or major remodel building trades construction.
- 2. The conductors for the fire alarm system are installed in conduit.

Unlisted classifications needed for work not included within the scope of the classifications listed may be added after award only as provided in the labor standards contract clauses (29CFR 5.5 (a) (1) (ii)).

The body of each wage determination lists the classification and wage rates that have been found to be prevailing for the cited type(s) of construction in the area covered by the wage determination. The classifications are listed in alphabetical order of "identifiers" that indicate whether the particular rate is a union rate (current union negotiated rate for local), a survey rate (weighted average rate) or a union average rate (weighted union average rate).

Union Rate Identifiers

A four letter classification abbreviation identifier enclosed in dotted lines beginning with characters other than "SU" or "UAVG" denotes that the union classification and rate were prevailing for that classification in the survey. Example: PLUM0198-005 07/01/2014. PLUM is an abbreviation identifier of the union which prevailed in the survey for this classification, which in this example would be Plumbers. 0198 indicates the local union number or district council number where applicable, i.e., Plumbers Local 0198. The next number, 005 in the example, is an internal number used in processing the wage determination. 07/01/2014 is the effective date of the most current negotiated rate, which in this example is July 1, 2014.

Union prevailing wage rates are updated to reflect all rate changes in the collective bargaining agreement (CBA) governing this classification and rate.

Survey Rate Identifiers

Classifications listed under the "SU" identifier indicate that no one rate prevailed for this classification in the survey and the published rate is derived by computing a weighted average rate based on all the rates reported in the survey for that classification. As this weighted average rate includes all rates reported in the survey, it may include both union and non-union rates. Example: SULA2012-007 5/13/2014. SU indicates the rates are survey rates based on a weighted average calculation of rates and are not majority rates. LA indicates the State of Louisiana. 2012 is the year of survey on which these classifications and rates are based. The next number, 007 in the example, is an internal number used in producing the wage determination. 5/13/2014 indicates the survey completion date for the classifications and rates under that identifier.

Survey wage rates are not updated and remain in effect until a new survey is conducted.

Union Average Rate Identifiers

Classification(s) listed under the UAVG identifier indicate that no single majority rate prevailed for those classifications; however, 100% of the data reported for the classifications was union data. EXAMPLE: UAVG-OH-0010 08/29/2014. UAVG indicates that the rate is a weighted union average rate. OH indicates the state. The next number, 0010 in the example, is an internal number used in producing the wage determination. 08/29/2014 indicates the survey completion date for the classifications and rates under that identifier.

A UAVG rate will be updated once a year, usually in January of each year, to reflect a weighted average of the current negotiated/CBA rate of the union locals from which the rate is based.

WAGE DETERMINATION APPEALS PROCESS

- 1.) Has there been an initial decision in the matter? This can be:
- * an existing published wage determination
- * a survey underlying a wage determination
- * a Wage and Hour Division letter setting forth a position on a wage determination matter
- * a conformance (additional classification and rate) ruling

On survey related matters, initial contact, including requests for summaries of surveys, should be with the Wage and Hour Regional Office for the area in which the survey was conducted because those Regional Offices have responsibility for the Davis-Bacon survey program. If the response from this initial contact is not satisfactory, then the process described in 2.) and 3.) should be followed.

With regard to any other matter not yet ripe for the formal process described here, initial contact should be with the Branch of Construction Wage Determinations. Write to:

Branch of Construction Wage Determinations Wage and Hour Division U.S. Department of Labor 200 Constitution Avenue, N.W. Washington, DC 20210

2.) If the answer to the question in 1.) is yes, then an interested party (those affected by the action) can request review and reconsideration from the Wage and Hour Administrator (See 29 CFR Part 1.8 and 29 CFR Part 7). Write to:

Wage and Hour Administrator U.S. Department of Labor 200 Constitution Avenue, N.W. Washington, DC 20210

The request should be accompanied by a full statement of the interested party's position and by any information (wage payment data, project description, area practice material, etc.) that the requestor considers relevant to the issue.

3.) If the decision of the Administrator is not favorable, an interested party may appeal directly to the Administrative Review Board (formerly the Wage Appeals Board). Write to:

Administrative Review Board U.S. Department of Labor 200 Constitution Avenue, N.W. Washington, DC 20210

4.) All decisions by the Administrative Review Board are final.

Note: Under Executive Order (EO) 13658, an hourly minimum wage of \$10.15 for calendar year 2016 applies to all contracts subject to the Davis-Bacon Act for which the solicitation was issued on or after January 1, 2015. If this contract is covered by the EO, the contractor must pay all workers in any classification listed on this wage determination at least \$10.15 (or the applicable wage rate listed on this wage determination, if it is higher) for all hours spent performing on the contract in calendar year 2016. The EO minimum wage rate will be adjusted annually. Additional information on contractor requirements and worker protections under the EO is available at www.dol.gov/whd/govcontracts.

Unlisted classifications needed for work not included within the scope of the classifications listed may be added after award only as provided in the labor standards contract clauses (29CFR 5.5 (a) (1) (ii)).

The body of each wage determination lists the classification and wage rates that have been found to be prevailing for the cited type(s) of construction in the area covered by the wage determination. The classifications are listed in alphabetical order of "identifiers" that indicate whether the particular rate is a union rate (current union negotiated rate for local),

a survey rate (weighted average rate) or a union average rate (weighted union average rate).

Union Rate Identifiers

A four letter classification abbreviation identifier enclosed in dotted lines beginning with characters other than "SU" or "UAVG" denotes that the union classification and rate were prevailing for that classification in the survey. Example: PLUM0198-005 07/01/2014. PLUM is an abbreviation identifier of the union which prevailed in the survey for this classification, which in this example would be Plumbers. 0198 indicates the local union number or district council number where applicable, i.e., Plumbers Local 0198. The next number, 005 in the example, is an internal number used in processing the wage determination. 07/01/2014 is the effective date of the most current negotiated rate, which in this example is July 1, 2014.

Union prevailing wage rates are updated to reflect all rate changes in the collective bargaining agreement (CBA) governing this classification and rate.

Survey Rate Identifiers

Classifications listed under the "SU" identifier indicate that no one rate prevailed for this classification in the survey and the published rate is derived by computing a weighted average rate based on all the rates reported in the survey for that classification. As this weighted average rate includes all rates reported in the survey, it may include both union and non-union rates. Example: SULA2012-007 5/13/2014. SU indicates the rates are survey rates based on a weighted average calculation of rates and are not majority rates. LA indicates the State of Louisiana. 2012 is the year of survey on which these classifications and rates are based. The next number, 007 in the example, is an internal number used in producing the wage determination. 5/13/2014 indicates the survey completion date for the classifications and rates under that identifier.

Survey wage rates are not updated and remain in effect until a new survey is conducted.

Union Average Rate Identifiers

Classification(s) listed under the UAVG identifier indicate that no single majority rate prevailed for those classifications; however, 100% of the data reported for the classifications was union data. EXAMPLE: UAVG-OH-0010 08/29/2014. UAVG indicates that the rate is a weighted union average rate. OH indicates the state. The next number, 0010 in the example, is an internal number used in producing the wage determination. 08/29/2014 indicates the survey completion date for the classifications and rates under that identifier.

A UAVG rate will be updated once a year, usually in January of

each year, to reflect a weighted average of the current negotiated/CBA rate of the union locals from which the rate is based.

WAGE DETERMINATION APPEALS PROCESS

- 1.) Has there been an initial decision in the matter? This can
- * an existing published wage determination
- * a survey underlying a wage determination
- * a Wage and Hour Division letter setting forth a position on a wage determination matter
- * a conformance (additional classification and rate) ruling

On survey related matters, initial contact, including requests for summaries of surveys, should be with the Wage and Hour Regional Office for the area in which the survey was conducted because those Regional Offices have responsibility for the Davis-Bacon survey program. If the response from this initial contact is not satisfactory, then the process described in 2.) and 3.) should be followed.

With regard to any other matter not yet ripe for the formal process described here, initial contact should be with the Branch of Construction Wage Determinations. Write to:

Branch of Construction Wage Determinations Wage and Hour Division U.S. Department of Labor 200 Constitution Avenue, N.W. Washington, DC 20210

2.) If the answer to the question in 1.) is yes, then an interested party (those affected by the action) can request review and reconsideration from the Wage and Hour Administrator (See 29 CFR Part 1.8 and 29 CFR Part 7). Write to:

Wage and Hour Administrator U.S. Department of Labor 200 Constitution Avenue, N.W. Washington, DC 20210

The request should be accompanied by a full statement of the interested party's position and by any information (wage payment data, project description, area practice material, etc.) that the requestor considers relevant to the issue.

3.) If the decision of the Administrator is not favorable, an interested party may appeal directly to the Administrative Review Board (formerly the Wage Appeals Board). Write to:

Administrative Review Board U.S. Department of Labor 200 Constitution Avenue, N.W. Washington, DC 20210

4.) All decisions by the Administrative Review Board are final.

END OF GENERAL DECISION
