

## A Brighter, Cleaner Delaware: Tapping Renewable Energy Resources

We're lucky to live in a state that recognizes the twin power of energy efficiency and clean energy sources like solar, wind and geothermal. Energize Delaware's renewable energy programs are focused on helping Delawareans save money, create jobs and improve the environment. Renewable energy is a smart way to reduce your carbon footprint, stabilize electric costs, and preserve natural resources.

## Energy Education: Knowledge is Power

Making your home or business energy efficient and protecting our environment may sound costly or complicated, but it's not. In fact you only have to remember three things:

- **RETHINK** how you use energy;
- **RECEIVE** rebates and tips on saving energy and money;
- As a result, join in the movement to **RENEW** our planet.

That's what Energize Delaware is all about. We provide rebates, tips, low interest financing and other energy-saving solutions to residents, businesses, non-profits who want to reduce their utility bills and protect our state's natural resources.

## The Sustainable Energy Utility and Energize Delaware

The Sustainable Energy Utility (SEU) is a unique non-profit organization offering a one-stop resource through its Energize Delaware initiative to help residents and businesses save money through clean energy and efficiency. The SEU was created in 2007 by the state of Delaware to foster a sustainable energy future for the state.

The action of Delawareans taking advantage of the energy efficiency solutions is adding up to big energy savings. This is particularly important for a state that where per capita energy consumption is higher than uses more energy than its neighbors.

Energy Utility*

## For Your Home

A drafty room, rooms that are too hot or too cold, and high energy bills are common issues for homeowners.

A *home energy audit* is often the first step in making your home more efficient. It can help you assess how much energy your home uses and evaluate what steps you can take to lower your energy bills and make your home more comfortable.

For more information about Energize Delaware's home energy savings programs, please visit:

## For Your Business

Business is all about the bottom line. That's why Energize Delaware has structured its business programs to offset the expense of capital investments with savings in utility costs.

As Delaware's one-stop resource for saving money, creating jobs and improving the environment, Energize Delaware offers new ways for commercial, industrial and other non-residential groups to become full partners in Delaware's sustainable energy future.

Together we have the ability to save millions of dollars a year and reduce greenhouse gases that harm the environment—just by using energy wisely.

Find out more about our energy savings programs for businesses. Please visit:

## For Public and Non-Profits

Energize Delaware is committed to helping public-sector organizations and non-profits save energy and money by increasing the energy efficiency of their facilities. Whether it's replacing older equipment with higher efficiency units, acquiring financing for upgrades or providing a comprehensive building approach, we have a program to address your specific needs.

After all, every dollar saved on utility costs goes directly toward fulfilling your mission.
