Driveway Pipe Policy

1. Applicants will supply their own pipe. Corrugated smooth wall or corrugated steel suitable for highway use.
2. Pipe cannot be old water heaters or anything substandard.
3. If installing more than 20', all connection must be proper banding.
4. A County Supervisor will visit the site, check for ditch cleaning and size of pipe needed.
5. It is the owners responsibility to maintain the pipe. Keep ends free from debris that may plug pipe and restrict water flow.
