RE: Neptune Metering System Compatibility with Vadim Software

On behalf of Neptune Technology Group, I would like to confirm that Neptune's metering system is compatible Vadim Software. Neptune has a large number of metering systems customers across Canada that use the Vadim Billing Software package. Neptune has successfully worked with Vadim to assist utilities, like the Town of Kindersley, in developing transfer files which interface Neptune's metering application with various billing systems like Vadim software.

If you have any additional questions please feel free to contact me at your earliest convenience.

Sincerely,

Raymond Cheung, Marketing Manager
Neptune Technology Group

Re: Neptune Water Meters

Dear Susan:

We are happy to confirm that Vadim iCity Utility Billing software has no known compatibility issues with Neptune N_Sight and drive by radio reads. We have multiple customers using this meter equipment in conjunction with iCity software.

Yours truly,

Kathy Auch
Customer Support Manager
