This project is partially funded by a grant from the Transportation and Growth Management (TGM) Program, a joint program of the Oregon Department of Transportation and the Oregon Department of Land Conservation and Development. This TGM grant is financed, in part, by Federal Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU), local government, and the State of Oregon funds.
The contents of this document do not necessarily reflect views or policies of the State of Oregon.
Acknowledgements

This report was prepared through the collective effort of the following people:

City of Sandy Staff
Tracy Brown – Planning Director
Scott Lazenby – City Manager
Julie Stephens – Transit Manager
Liz Storn – Project Manager
Mike Walker – Public Works Director

ODOT Staff
Dan Bacon – District 2C Maintenance Assistant Manager
Marty Jensvold – Region 1 Access Management Engineer
Sonya Kazen – TGM Grant Manager, Region 1 Planning
Avi Tayar – Region 1 Traffic Analyst

Citizens Advisory Committee/Technical Advisory Committee
Don Allen – City Council, Transit Advisory Committee
Tim Belanger – Oregon Trail School District
Don Carlton – Planning Commission
Lois Coleman – City Council
Ron Lesowski – Planning Commission, Tollgate Inn
Jeremy Pietzold – City Council
Robert Watts
Hollis Wenzel – Sandy Chamber

Consultant Team
John Bosket – Project Manager, DKS Associates
Carl Springer – DKS Associates
Michael Tomasini – DKS Associates
Darci Rudzinski – Angelo Planning Group
Aaron Isenhart – Harper Houf Peterson Righellis Inc.
Justin Healy – Real Urban Geographics
Christine Heycke – CPH Planning
# Table of Contents

**Chapter 1: Introduction** .................................................................................................................... 1  
  TSP Development Process .................................................................................................................. 1  
  TSP Organization ............................................................................................................................... 2  

**Chapter 2: Transportation Goals** .................................................................................................... 3  
  Mobility/Circulation/Safety Goals ........................................................................................................ 3  
  Capital Improvement Goals .................................................................................................................. 3  
  Community Goals ............................................................................................................................... 3  
  Economic Development Goals ............................................................................................................. 3  
  Environmental Goals .......................................................................................................................... 4  

**Chapter 3: Modal Plans** ................................................................................................................... 5  
  Pedestrian System Plan ......................................................................................................................... 5  
  Recommended Pedestrian Projects ...................................................................................................... 5  
  Bicycle System Plan ........................................................................................................................... 9  
  Recommended Bicycle Projects ............................................................................................................ 9  
  Sandy Transit Master Plan .................................................................................................................... 14  
  Motor Vehicle System Plan .................................................................................................................. 14  
  Transportation System Management .................................................................................................... 14  
  Motor Vehicle System Projects .......................................................................................................... 34  
  Transportation Demand Management .................................................................................................. 41  
  Other Transportation Modes .............................................................................................................. 42  
  Air ...................................................................................................................................................... 42  
  Rail .................................................................................................................................................... 43  
  Water ................................................................................................................................................ 43  
  Pipeline/ Transmission Line .................................................................................................................. 43  

**Chapter 4: Plan Implementation** ....................................................................................................... 44  
  Projected Funding for Transportation Improvements .......................................................................... 44  
  Project Programming ............................................................................................................................ 45  
  Potential New Funding Sources .......................................................................................................... 50  
  State and County Contributions .......................................................................................................... 50  
  City Sources ....................................................................................................................................... 51  
  Implementation ................................................................................................................................... 54

Appendix

Technical Memorandum #1: Plans, Goals, & Policies Review
Technical Memorandum #2: Existing Conditions and Future Needs
Technical Memorandum #3: Transportation Alternatives and Improvement Strategies
Implementation Element Memorandum – Recommended Sandy Municipal Code Amendments
Public Involvement Documentation
Alternate Mobility Standards Report

Useful Abbreviations and Acronyms

ADA – Americans with Disabilities Act
ADT – Average Daily Traffic
HDM – Highway Design Manual
LOS – Level of Service
MPH – Miles per Hour
NTM – Neighborhood Traffic Management
ODOT – Oregon Department of Transportation
OHP – Oregon Highway Plan
SDC – System Development Charge
STA – Special Transportation Area
TDM – Transportation Demand Management
TPR – Transportation Planning Rule
TSM – Transportation System Management
TSP – Transportation System Plan
UGB – Urban Growth Boundary
V/C – Volume to Capacity Ratio
VMT – Vehicle Miles Traveled
